# LUME PLAY

**LUME PLAY** combines design, precision engineering, and AI intelligence to create lighting that performs as beautifully as it looks. Built with a deep understanding of architectural spaces, it balances aesthetics, efficiency, and adaptability from interiors to large-scale exteriors. Built for modern spaces. Designed for lasting impact.

LUMIFIC

The background of the entire page is an abstract, dynamic composition of light streaks. These streaks radiate from the right side, creating a sense of motion and depth. The color palette is primarily deep blues and teals, with occasional streaks of vibrant red and orange, particularly in the upper right quadrant. The overall effect is reminiscent of a starburst or a high-speed light trail.

# BLUE LIGHT IS EVERYWHERE

---

## USE BLUE LIGHT WISELY TO PROTECT YOUR EYE HEALTH.

The extent to which blue light is harmful to the eyes varies with age. Older people, the crystal will become yellow with age while children are sensitive to strong blue light, which can cause vision loss and even eye diseases. It is worth noting that, in practice, we generally do not look directly at the LED lights, but look directly at the cell phone and computer screen will be a long time only to develop good eye habits in order to effectively reduce the damage to the eyes of blue light.
